## SUMMARY

I am a Front End developer with a keen interest in blockchain technology, particularly focusing on Ethereum and Solidity for Web3 development. Passionate about exploring the intersection of decentralized technologies and user interfaces, I strive to create intuitive and engaging experiences that leverage the potential of blockchain. With a strong foundation in web development and a drive to innovate within the blockchain space, I am committed to contributing to the evolution of decentralized applications and reshaping the future of digital interactions.

## EXPERIENCE

### Front-end Developer Intern

Rayo Labs

June 2024 - Present

• Improvements in the project where the front end written using Next.js and the back end are communicated using wagmi

## PROJECTS

### WitnessBase

ETHGlobal • [ethglobal.com/showcase/witnessbase-gc864](https://ethglobal.com/showcase/witnessbase-gc864) • April 2024 - April 2024

• WitnessBase: Creates proofs for unregistered product innovations with blockchain verification. Say goodbye to lengthy registration processes and hello to streamlined authenticity protection.

### Muse (Hackathon Winner Project)

ETHGlobal • [ethglobal.com/showcase/muse-2tonx](https://ethglobal.com/showcase/muse-2tonx) • March 2024 - March 2024

• At a recent hackathon event, I developed a novel solution leveraging frame-based technology to facilitate users in listening to and receiving song recommendations. This project integrates frame technology with music streaming services to create an immersive experience for users.

### NFT Marketplace

ITU Blockchain • [nft-market-place-0.vercel.app/](https://nft-market-place-0.vercel.app/) • February 2024 - February 2024

• A NFT Marketplace for ITU Blockchain.

### BOO! the Faciliator (Hackathon Winner Project)

ETHGlobal • [ethglobal.com/showcase/boo-the-faciliator-s99rc](https://ethglobal.com/showcase/boo-the-faciliator-s99rc) • January 2024 - January 2024

• BOO! is an innovative Native Bitcoin GHO Faciliator, trustless mechanism where BTC transactions verifying via its BTC LightClient(spv) and minting GHO on Ethereum, with user ETH addresses tagged in OP\_RETURN parsed by specialized contract.

## EDUCATION

### Software Engineering

Bahcesehir University • Istanbul, Türkiye • 2021

## CERTIFICATIONS

### Scaling Ethereum, LFGHO, Circuit Breaker, Frameworks

ETHGlobal • 2024

• Hackathon participation certificate

## INVOLVEMENT

### Front End Developer

Istanbul Technical University • ITU Blockchain • October 2023 - Present

• ITU blockchain Devs Committee attending hackathons and presenting ITU blockchain .

## SKILLS

Front End: HTML, CSS, JavaScript, TypeScript, React, Next.js, Tailwind CSS, Wagmi

Back End: Solidity, Java
